

# POL 345 – Fall 2018 – Precept Evaluations

## Section 1:

### Instructor Questions - Frequency Analysis

I think that the overall quality of the precepts was:

1. I think that the overall quality of the precepts was:			
Options	Score	Count	Percentage
Excellent	5	12	100%
Very Good	4	0	0%
Good	3	0	0%
Fair	2	0	0%
Poor	1	0	0%

**Precepts - Please comment on the quality of the precepts. How did they contribute to your learning in the course? To what extent did the preceptor raise challenging questions, help clarify course material, and encourage broad student participation? Was the preceptor responsive to students' questions, opinions, and criticism?**

Comments
Federico is amazing!!!!!!!!!!!!!! He did everything perfectly. I can't express how wonderful of a preceptor he was.
The preceptor was awesome, very supportive and was great for clarification on really any question I had. He even went out of his way to email me some sources he thought were interesting for my research project, which showed me he really cared about his work. He was also able to handle criticism well, and constantly made his best effort to work to make some improvements that helped us learn more and more efficiently
Federico was a great preceptor, helped me understand a lot of the concepts brought up in class. He was also highly available for questions outside of class.
Precept was excellent. Federico is the best preceptor I've had at Princeton so far. I appreciated the review of content, along with coding during the well-structured precepts.
Federico is amazing!!! He is singularly the most dedicated preceptor I have ever had. He consistently had office hours that went two or three hours over the specified time, and he would answer emails at 1 or 2 in the morning. I attribute my success in this class mostly to him!
Precepts were an essential part of consolidating the theory from lecture and learning how to code. Federico is an amazing preceptor and was always helpful and available to teach us.
The precepts were so much more helpful to me than lecture. Federico was an amazing preceptor and he really truly cared about the students and whether or not everyone was following along and what not. I honestly do not think I could have gotten through this course without him, he was a godsend.
Federico was an amazing preceptor and really helped me to learn and actually enjoy this class!
SO AMAZING. I cannot tell u enough that Federico is the most amazing preceptor I have ever had. That sentence means nothing compared to how amazing he was. He is a genius, he can teach information amazingly well, he's the nicest guy, what else should I say. His precept significantly if not totally contributed to why I loved this class. and why I am learning so much.
Federico was incredibly helpful. He challenged us, and gave us the confidence and the tools to do well. I would highly recommend.
Federico is amazing and he's always so so helpful. He goes above and beyond required steps!!

## Section 2:

### Instructor Questions - Frequency Analysis

I think that the overall quality of the precepts was:

1. I think that the overall quality of the precepts was:			
Options	Score	Count	Percentage
Excellent	5	9	100%
Very Good	4	0	0%
Good	3	0	0%
Fair	2	0	0%
Poor	1	0	0%

AMAZING! Federico is the reason I understood R. He is a great teacher. The best preceptor I have ever had. He knows how to explain concepts and coding. All around person. A remarkable educator who knows how to teach effectively. Very impressed. I would take a class with him if he were a professor. He is the reason I might be taking POL 346. He is the only reason for this. AMAZING AMAZING AMAZING. Changed by overall experience with the course.
F. Tiberti is a god-like preceptor who does everything for his students. He deserves some real public recognition for his work. A+.
The preceptor was instrumental to my success in this course. He gave so much help and time outside of class and precept and was an excellent resource and teacher.
My preceptor was amazing. It is so easy to teach statistics badly. And especially when learning r commands, it is easy to bore students. Federico Tiberti deserves massive respect for being the preceptor I could have asked for!
My preceptor was amazing! Always came prepared to precept and was always available to help with assignments and answer our questions! He even wrote me a 5 paragraph explanation at night when I was confused about a topic to help clear it up for me! Federico is probably the best preceptor I've had at Princeton!
Federico is the best!!
I was extremely lucky to be in Federico's Thursday night precept this semester. While this was his first time running a precept for a statistics course, he maintained a well-organized class, taught the material very well, and gracefully dealt with students' needs in high-demand periods (including staying late at extra office hours he scheduled to help students with problem sets). He was always willing to work through difficult concepts in different ways and made great use of examples to demonstrate their application. I definitely feel that Federico's support was an important factor in my success and enjoyment of this class.
The precepts helped so much with coding! Federico was the best preceptor I've had at Princeton yet. He helped me through every handout, problem set, and in-precept assignment. He was so helpful and held so many office hours, making sure to respond to every student's needs in each set of office hours. It even made the 7:30pm precept fine.
